

# Eight Things Successful People Do!

(1) Successful people do more with less – It’s not what you have that will determine your success or failure in life but what you do with what you have!

(2) Successful people are courageous- It is always better to pursue something great that frightens you; rather than spend your time pursuing something small that puts you at ease. Courage is an important ingredient of success!

(3) Successful people are disciplined – Your ability to discipline yourself to do what you should, when you should, whether you feel like it or not, is one of the keys to becoming a person of excellence and living a life of uncommon success.

(4) Successful people are committed – life will only release success and greatness to you in the field you apply commitment to the truth that governs it

(5) Successful people know that success is impossible without goals; they set goals for themselves – You can not achieve what you have not defined!

(6) Successful people are determined – they make up their minds to be successful in everything they do and they let nothing make them go back on their decision

(7) Successful people do more and talk less – Nobody is going to believe in what you say until they believe in what you do. Your actions give your words credibility!”

(8) Successful people are not scared to fail – Protecting yourself from failure destroys your ability to become successful; Success is failure turned inside out
